

Quality Policy Statement

Ultra Electronics Limited PMES provides design, development, manufacturing, test, installation, spares and support services to customers requiring:-

- **Power Conversion and Electric Motors** Naval power converters, power supply units, variable speed drives & systems, Gas Turbine Electric Start (GTES) systems.
- **Power Control Systems** Static frequency converters & systems, specialised control consoles and reactor control & instrumentation systems, aircraft ground servicing systems.
- **Underwater Measurement Systems** Underwater measurement disciplines, degaussing products, fixed and onboard degaussing equipment and magnetic field measurement instruments, magnetic and electric sensor products.
- **Rail Systems Power** Stand alone transformers and rectifiers through to turnkey power systems including system design.
- **Power Transformer solutions** within the rail, mining, energy distribution and renewable energy markets.

PMES is committed to comply with customer and ISO 9001 requirements and strives to continually improve the effectiveness of the Quality, Environmental, Occupational Health & Safety business management systems and other relevant international standards.

PMES seeks to identify and strive for continual improvement in business excellence and customer satisfaction by continually improving our:-

Stakeholder Relationships – Improving **communication** both internally and externally. Consulting and communicating with our key and prospective customers, suppliers, employees and the local community with the aim to improve and maintain our **reputation** within industry.

Product – Improving our products using the application of lean principles, compliance to ISO 9001 and other relevant international and workmanship standards. To continue to provide **reliability** through, controlling projects effectively and ensuring our customers have direct access to professional personnel who understand the needs of our customers.

Processes – Continual improvement of our processes via identifying interfaces, measurement of process activities, streamlining our processes as required, ensuring process waste reduction and increased **efficiency** to guarantee output requirements are met.

People – Improving the quality and retention of our employees through first class recruitment, personal development programmes, training, mentoring, organisational succession planning and by instilling the Ultra ethos of LEAP.

Communication within the business is through direction from the Senior Management Team, company briefings, Managing Director briefings, induction, notice boards, e-systems, internal review meetings and local briefings.
